**Volume 7, Number 2, 2023**

Welcome to Chempublish Journal. We extend our gratitude to the authors, reviewers, and the Department of Chemistry, Faculty of Science and Technology Universitas Jambi for their support in publishing Volume 7, Number 2, 2023. This issue presents seven articles, primarily featuring original research in chemistry and chemistry education. Highlights include studies on natural corrosion inhibitors in Indonesia, nutritional analysis of fish, the potential of waste fruit seeds, and microbial research in food science. Additionally, this edition introduces an innovative approach to chemistry education using integrated learning method of Project-Based Learning and STEM. It concludes with a comprehensive review article on Claisen Rearrangement in organic chemistry, showcasing the wide scope and depth of contemporary scientific research and education.

Chempublish Journal is a scientific multidisciplinary journal in the field of chemistry including educational chemistry, applied chemistry, and chemical engineering, powered by Department of Chemistry, Faculty of Science and Technology Universitas Jambi, Jambi, Indonesia. The Publishing frequency is 2 issues per year, in July and December. The criteria of the submitted article covers the following types of articles: first, the article presents the results of research in certain topic in Chemistry and Applied Chemistry; second, the review article and last, Communication (Based on Editor's Invitation). We are looking forward to receiving extraordinary manuscripts and to promoting the development in the cutting-edge of chemistry.
